

Nabil Elkorchi

Worcester, Massachusetts, nelkorchi@umass.edu, (774) 525-6865

Education:

University of Massachusetts Amherst

Fall 2026, M.S Fall 2027

Bachelor of Science, Civil and Environmental Engineering

Amherst, Massachusetts

GPA: 3.3

Relevant Coursework: Structural Analysis, Advanced Concrete Design, Geotechnical Site Investigations

Experience:

DN Tanks

June 2026 – August 2026

Design Engineer Intern

Wakefield, MA

- Modeled tank floor reactions under various loadings and different foundation configurations using SAFE.
- Devised prestressing wire configurations for both pre-bid but also final design project phases then modeled tank wall behavior, having resulted in pivotal changes preventing costly design revisions.
- Reviewed geotechnical reports, communicated concerns during bid meetings and made RFI's for missing data.
- Developed AutoCAD, Excel and SAFE tutorials for recent hires and standardized drawings, improving team efficiency.

UMass Amherst - Department of Civil Engineering

February 2026 – May 2026

Teaching Assistant for CEE 651 - Piloting UAVs | Research Assistant

Amherst, MA

- Collaborated in teaching and grading a 20+ student class that taught students how to fly drones, maintain them and plan flights. Provided support outside of class for the UMass Air research team, notably flight mapping/in-situ data collection.

Luseo Engineering

June 2025 – August 2025

Project Manager Intern

Rabat, Morocco

- Oversaw the development of the Royal Mohammed VI Hospital/University Complex, 270 000 square meters of usable space including 5 buildings and a 25 floor tower.
- Attended weekly team meetings and absorbed how the company dealt with possible work opportunities, negotiation, client interviews, employee mistakes and project planning.
- Identified discrepancies between floor plans and on site installations and communicated them to the relevant teams.
- Researched the compliance of certain installations with legal requirements, devising numerous RFI's and change notices.
- Identified conceptual errors on architectural blueprints and communicated them to fellow engineers.

Co Ex Engineering

June 2024 – August 2024

Topography Intern

Rabat, Morocco

- Operated and maintained complex and highly technical surveying equipment.
- Used gps base/rover sets, a chcnv i50 gnss (to collect information and coordinates on the field), a Leica 3d scanner (to visualize the inside of the building that was being scanned) and used a total station to measure relief elevation.
- Used AutoCad extensively to help make floor plans for clients requesting them, Pix4dmapper (drone picture processing program) to get an overview of the terrain the company was called to survey and CloudWorx to process data from a 3d laser scanner.

Skills and Interest:

Federal Aviation Administration Licensed Drone Pilot (Part 107)

General Representative/Spokesperson of the Umass AGC (American General Contractors) chapter.

Skills: AutoCAD, SAP2000, CSI SAFE, Proficient in 3 languages (English, French, Arabic), Microsoft Office Suite, Bluebeam Revu.

Interests: Drone building and programming, Intramural Soccer Team, Skiing, Piano, Tennis, Reading.
